

The Ministry of Labor has opened a new coordination center in Satun province for fishing laborers, to provide comprehensive labor services, as well as facilitating employers and workers. The center focuses on proactive services to increase efficiency, reduce travel expenses to contact government officials, and to prevent, suppress, block and eliminate human trafficking in the form of fishery workers. The center will also provide foreign labor management services, iris scanning, fishery and aquatic processing, notification of entry-exit of foreign workers, the addition of employers, submission of requests to hire foreign workers through MOUs, and consultation for legal employment of foreign workers.
